TITLE	1976-77 California Public Schools Selected Statistics: Operating Units, Revenues, Teachers and Pupils, Expenditures.
INSTITUTION	California State Dept. of Education, Sacramento. Bureau of School Apportionments and Reports.
PUB DATE	78
NOTE	227p.
AVAILABLE FROM	Publications Sales, California State Department of Education, P.O. Box 271, Sacramento, California 95802 ($1.00)
EDRS PRICE	MF-$0.83 Plus Postage. HC Not Available from EDRS.
DESCRIPTORS	Elementary Secondary Education; Enrollment; Expenditures; *School Statistics; *Statistical Data; Tables (Data); Teacher Salaries
IDENTIFIERS	California

ABSTRACT

Statistics on the California school system presented in this publication are prerequisites to the determination of policy at the state and local levels. This publication lists the number of pupils, teachers, and schools in the California school system and associated programs in the 1976-77 school year. It also records the expenditures of public funds needed to educate the 4.3 million students in public elementary schools and high schools in that year. The educational statistics in this publication are diverse and widely ranging. Part 1 presents such information as number of districts and schools, school lunch program participation, breakfast program participation, and total milk consumption in the California educational system. Part 2 records facts concerning teachers and pupils, including teacher salaries, number of full-time equivalent employees, public school enrollments for fall of 1975 and 1976, and private school enrollments from 1974 to 1976. Part 3 concerns public school revenues, assessed valuation figures, revenue limits, bond elections, tax rates, and numbers of textbooks. Part 4 records public school general fund expenditures. Foreword

This document is the most up-to-date and complete statistical picture of California education that we have available. It documents statistically how many students we enroll in our schools, how many books they use, how many lunches they eat, and how many teachers and how much money it takes to educate them. From the very beginning of public education in California, we have used the data in *California Public Schools Selected Statistics* and its predecessors to help us examine where we were and to develop a framework for where we were going.

My responsibilities as Superintendent and yours as legislator, school administrator, teacher, or concerned parent require us to orient much of our thinking to the future because we are educating children for another time. However, we who have responsibilities for the education of a coming generation must have the data of the past to plan intelligently for the future. This publication presents many of the statistics that are important in helping us do that vital planning. It is not surprising, therefore, to learn that those concerned with improving the equity and quality of education have used this statistical document in presenting their views; and others have turned to this publication for some of the important data they have needed in studying various options for financing public education.

As you turn the pages of this annual statistical report, you begin to get an idea of the size, scope, and complexity of our public school system in California, and you begin to understand how difficult the issues of school finance can be.

We have known for a long time that our present system of using local property taxes for the support of our schools is inequitable. This is true because some areas in California can raise a lot of money for schools by using a low tax rate while others can impose a much higher tax rate but raise much less money. Under our present system a child's educational expenses are largely dependent upon where he or she happens to live.

In response to the *Serrano* v. *Priest* decision, the 1976-77 state Legislature passed Assembly Bill 65, a comprehensive school finance bill aimed at making our school finance system both equitable and just. The bill highlights three fundamental principles that are necessary to address the intent and spirit of the court's decision: (1) ensure an equitable base level of support; (2) encourage renewal and reform of the educational system; and (3) provide for the special needs of such students as the disadvantaged, limited-English speaking, and the physically handicapped. I believe that as we resolve the issues raised by the *Serrano* decision, we must take this opportunity to provide a quality education for every child in California. It is not acceptable to me to spread poverty equally among our schools.

It is my firm belief that providing equity, adequacy, and quality requires a comprehensive approach to school finance issues; and to achieve the quality education we desire for our children, we must answer three basic questions:

1. How much do we want to spend?
2. How do we want to raise the money?
3. What kind of education do we want to provide with our tax dollars?

In addition, a fourth question must also be answered: What will our actions do for our children?

It is time for all of us–educators, legislators, and parents–to come to agreement regarding the answers to these important questions; but most of all the parents and local citizens must answer the questions because the schools belong to them. Yet they cannot answer the questions intelligently if they do not have the facts nor understand the issues. I hope this issue of *California Public Schools Selected Statistics* will provide us with some of the facts we must have to develop a sound approach to quality education for our children.

Wilson Riles

Superintendent of Public Instruction

Preface

This publication is concerned with quantitative aspects of the public school system in California; that is, with numbers of pupils, teachers, and schools and with expenditures of public funds needed to educate the 4.3 million children who attended California public elementary schools and high schools in the 1976-77 school year. Many of the items have been reported periodically to the Department from the beginnings of the California public school system. The trends, diversities, and disparities that are evident in these statistics are prerequisites to the determination of educational policy at the state and local levels.

Historically, data on community colleges in California have been incorporated with data for elementary schools and high schools. Beginning last year, however, a display of information on California's community colleges was discontinued. The change was brought about by the development of separate and unique reporting systems at the community college level. Questions concerning data on the community colleges should be directed to the Office of the Chancellor, California Community Colleges.

Users of this publication should be aware that the major changes in school accounting procedures which were mandated by the 1973 edition of the *California School Accounting Manual* were implemented by the school districts in the 1974-75 school year. The changes significantly revised the existing school accounting system; procedures and accounts were established for the accounting of expenditures by object rather than by function. The purpose of the revision was to provide flexibility in combining accounts to illuminate many different kinds of programs. Caution should be exercised, therefore, when comparisons are made between the expenditure data reported for the years before 1974-75 and those reported subsequently. Income accounts were expanded in 1974-75 also, but changes do not preclude comparisons with previous years as reported in this publication.

In 1973-74 legislation became effective that altered certain trends discernible in this publication and in previous editions. Senate Bill 90/1972 and subsequent related legislation represented a major change in the traditional approach to public school finance. The laws contained general property tax rollbacks and established district revenue limits to control annual changes in district income. Mechanisms were devised to lessen the disparities of expenditures between high-wealth, low-tax school districts and low-wealth, high-tax districts, a mandate of the California Supreme Court in the *Serrano* v. *Priest* decision. The school support formula developed in Senate Bill 90 and in subsequent legislation resulted in a flow of additional state funds and property tax relief to low-wealth districts. Most high-wealth districts were granted some relief from inflation, but some were required to increase local property taxes to maintain their previous expenditure levels.

Caution should be exercised when the second period average daily attendance reported in Table IV-14 is compared with that reported in editions of this publication issued before 1977. A portion of the second period average daily attendance in 1975-76 was "capped." The Budget Act of 1975 and Senate Bill

220/1975 placed a "cap" or limit on the attendance of district-maintained adult programs and regional occupational centers or programs and on the attendance of county-maintained regional occupational centers or programs. Attendance was limited, for apportionment purposes, to 105 percent of the 1974-75 second period average daily attendance in such programs. Because attendance in these programs constitutes a portion of the second period average daily attendance reported in Table IV-14, the totals are affected. Annual average daily attendance, used as a divisor in per-pupil income and expenditure figures throughout the publication, was not affected, however, by the cap.

This publication is the result of the efforts of the staff of the Bureau of School Apportionments and Reports. However, without timely reporting by school administrators throughout the state and other units within the Department of Education, it would have been impossible to compile these data, which are so important in defining where we have been in public education, where we are, and where we hope to be.

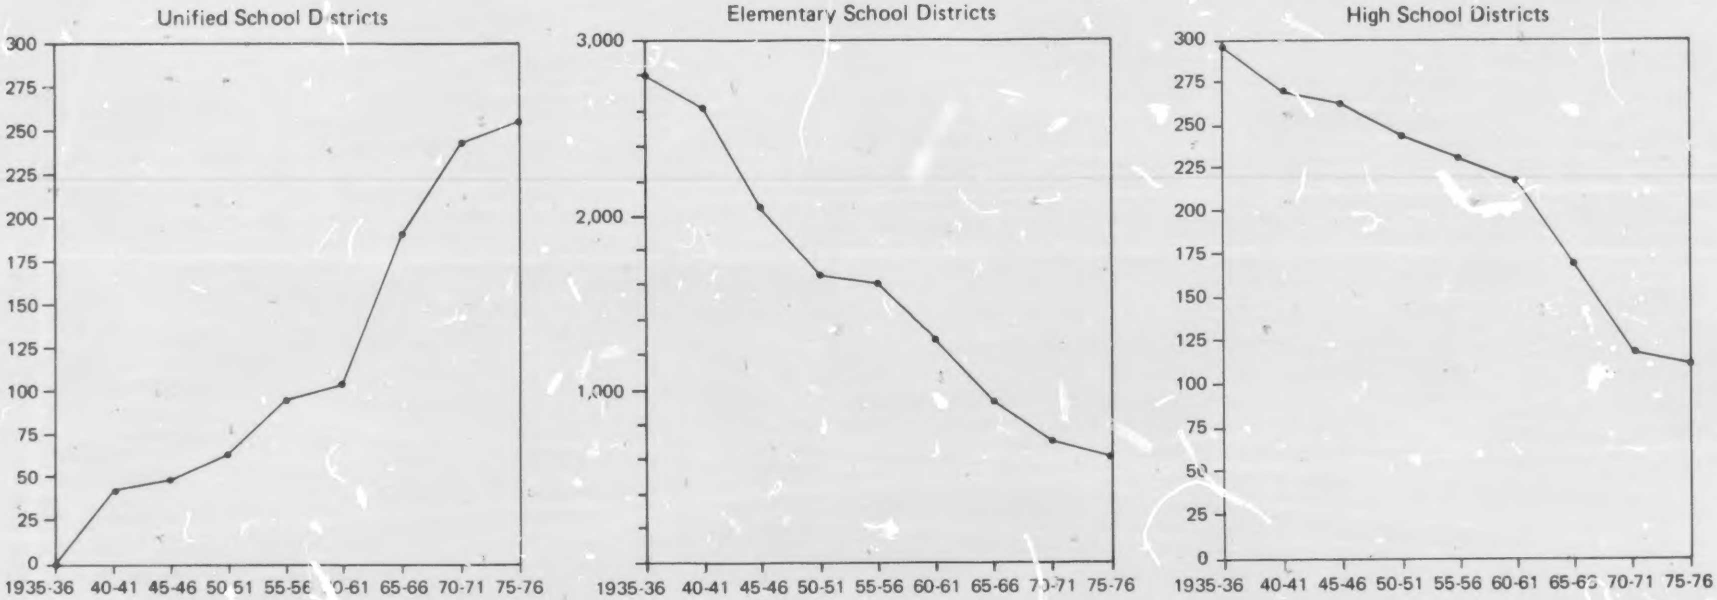
Summary: Current Expense and State Aid per Unit of A.D.A. and Percent of Income by Source 118

Number of California School Districts, 1935-36 Through 1975-76



Part I/District and School Units

Public education in California is organized administratively into the following categories: (1) the State Department of Education, which is empowered to exercise regulatory, leadership, and service functions to implement the state program of education; (2) the intermediate units; and (3) the school districts, the operation and control of which have been delegated to the people within broad limits established by the Legislature. The quality of the educational program is largely controlled at the local level by the school district governing board.

School Districts

Through the years experience has shown that the maintenance of an effective education program requires that school districts have (1) an adequate number of pupils; (2) a tax base that includes all of the resources of the community; (3) a coordinated educational program, kindergarten through grade twelve; and (4) inclusion of an entire community within the district.

In the 1976-77 school year, approximately two-thirds of the average daily attendance in California's public elementary and secondary schools was registered in 258 unified school districts. The 784 individual elementary school and high school districts served the remaining one-third of the students comprising the total state average daily attendance for kindergarten through grade twelve.

Schools

Few school districts can maintain a consistent pattern of grades in all of the elementary or secondary schools they operate because of obsolete buildings or population shifts within the districts. The predominant patterns for elementary schools are kindergarten through grade eight or kindergarten through grade six. But these patterns may be modified into primary schools (kindergarten through grade three); middle schools (grades four through six); and intermediate schools (grades seven and eight) or junior high schools (grades seven through nine). Typically, secondary schools are junior high schools and senior high schools (grades ten through twelve) or high schools having grades nine through twelve. Continuation high schools provide compulsory education programs for students sixteen and seventeen years of age who are required to attend school for three hours a day unless employed. If employed, students may attend continuation high school classes for a minimum of four hours a week.

Child Nutrition Programs

National School Lunch Program. In 1976-77 approximately 7,055 public and private schools participated in the National School Lunch Program and served 1.6 million lunches daily. Almost 58 percent of the meals were served free or at a reduced price.

Special Milk Program. The Special Milk Program provides midmorning or midafternoon nourishment for kindergarten pupils and for pupils who bring lunches from home. In 1976-77 the milk provided amounted to more than 170 million half-pint equivalents in addition to the 344 million half-pint equivalents provided through the school lunch program.

School Breakfast Program. In 1976-77 the rapidly growing School Breakfast Program involved 2,004 schools that served more than 283,000 breakfasts daily to children in low-income areas. Free breakfasts were provided for those unable to pay.

Federal support for child nutrition programs was very evident in 1976-77. The U.S. Department of Agriculture distributed to schools foods with a fair market value of $32.5 million and charged $2.8 million for such food. Federal cash reimbursements were increased from approximately $170 million in 1975-76 to more than $174 million in 1976-77.

1973-74	84,237,649	127,515,140	211,752,789
1974-75	108,007,736	182,150,536	290,158,272
1975-76	170,413,184	203,853,388[a]	374,266,572
1976-77	174,417,758	244,847,653[a]	419,265,411

NOTE: Includes nonpublic schools.

[a] Distribution of state and local support, 1976-77:

1. State expenditures for administration	$591,450
2. Support from general funds of school districts	53,400,539
3. Income from breakfast and lunch sales to children	60,620,852
4. Income from sales of a la carte food and milk and from miscellaneous foods (in previous years reported as "income from lunch sales to children")	67,673,176
5. Income from sales to adults (in previous years reported as "other income")	12,966,156
6. "Other" income	17,644,139
7. Senate Bill 120 funds [Ch. 1277 (1975)] —state meal reimbursement	24,880,333
Senate Bill 120 funds—subsidy, meals for needy	7,071,008
Total	$244,847,653

Part II/Teachers and Pupils

Teachers

In the fall of 1976, approximately 182,600 full-time teachers were employed in the California public elementary schools and high schools. The number of teachers decreased 5,070 from the number reported in fall of 1975. Teachers in elementary school were paid an average salary of $15,111 per annum; teachers in high school districts, $16,988 per annum; and teachers in unified school districts, $16,160 per annum.

Full-Time-Equivalent Employees

In the fall of 1976, California school districts employed approximately 14,900 full-time-equivalent administrators, 13,700 full-time-equivalent pupil personnel services employees, 206,560 full-time-equivalent teachers, and 141,490 full-time-equivalent classified employees. These numbers translate into ratios of 7.1 administrative employees, 6.7 pupil services employees, and 68.5 classified employees per 100 teachers. (Full-time-equivalents include full-time, part-time, and prorated portions of employee time.)

Pupils–Public Schools

The total enrollment in public elementary schools and high schools in the fall of 1976 decreased 8,337 from the fall of 1975. However, an enrollment increase of 30,834 in classes for adults masked the major decrease occurring in other enrollments. Enrollments in the elementary grades declined 1.7 percent, and enrollments in the high school grades declined 1.2 percent. A decline of 16.1 percent occurred in enrollments in special classes for the educable mentally retarded. This decline follows a decline of 10.8 percent for 1975 and can be explained at least in part by the use of new procedures in establishing pupil eligibility for enrollment in such classes.

32

Pupils–Private Schools

Enrollments in private elementary and high schools in California increased 12,135 from spring, 1975. In the spring of 1976, a total of 433,782 pupils were enrolled in 2,814 nonpublic schools. Of this number 337,314 (78 percent) were enrolled in church-affiliated private schools.

Class Size; Pupil-Teacher Ratios

In 1976-77 the average class size in grades one through three remained the same as the 1975-76 average of 27.5. The pupil-teacher ratio in grades four through eight decreased from 27.0 to 26.7. This pupil-teacher ratio is the lowest reported during the past seven years.

Days of Instruction

A minimum of 175 days of instruction must be offered by school districts in California unless some unusual circumstance intervenes. In 1976-77 two districts offered 180 or more days of instruction, and one-half of the districts operated at the minimum of 175 days.

Summer Schools

In 1976-77 more than 859,721 elementary school pupils attended summer school at least 200 minutes a day, five days a week, for four consecutive weeks. This attendance represented 32.9 percent of the state's fall enrollment in kindergarten through grade eight. Students representing about 39.6 percent of the state fall enrollment in grades nine through twelve attended summer school at least 240 minutes a day, five days a week, for six consecutive weeks. Typically, high school students enrolled in two subjects of their choice for the summer session.

33

Table II-1 A

Average Teacher Salaries in Unified School Districts Kindergarten Through Grade Twelve, 1976-77

Average daily attendance	Number of teachers	Average salary
25,000 and over	66,385	$16,662
10,000–24,999	27,532	15,859
4,000–9,999	15,931	15,548
1,000–3,999	7,280	14,556
500–999	853	13,588
100–499	415	12,720
Total	118,396	–
Average for all districts[a]	–	$16,160

[a] The average teacher salary in all unified school districts is obtained by dividing the total number of teachers into the total amount of salaries.

Table II-1 B

Average Teacher Salaries in Elementary School Districts 1976-77

Average daily attendance	Number of teachers	Average salary
10,000–24,999	8,952	$15,481
4,000–9,999	12,352	15,655
1,000–3,99	11,732	15,160
500–999	2,687	13,518
100–499	2,656	13,253
Under 100	416	11,779
Total	38,795	–
Average for all districts[a]	–	$15,111

[a] The average teacher salary in all elementary school districts is obtained by dividing the total number of teachers into the total amount of salaries.

Table II-1 C

Average Teacher Salaries in High School Districts 1976-77

Average daily attendance	Number of teachers	Average salary
25,000 and over	3,271	$16,910
10,000–24,999	9,090	17,695
4,000–9,999	5,378	17,297
1,000–3,999	2,760	15,072
500–999	824	15,239
100–499	309	13,445
Total	21,632	–
Average for all districts[a]	–	$16,988

[a] The average teacher salary in all high school districts is obtained by dividing the total number of teachers into the total amount of salaries.

Table II-1 D

Average Teacher Salary in County Offices of Education, 1976-77

Average daily attendance (all levels)	Number of teachers	Average salary
Total	3,771	–
Average[a]	–	$14,642

[a] The average teacher salary in all county offices of education is obtained by dividing the total number of teachers into the total amount of salaries.

Table II-1 E

Combined Average of Teacher Salaries in All School Districts and County Offices of Education 1972-73 Through 1976-77

Year	Number of teachers	Average salary[a]	Percent increase in salary over previous year
1976-77	182,594[b]	$16,004	4.70
1975-76	187,669	15,285	8.50
1974-75	187,452	14,087	9.62
1973-74	187,841	12,851	6.45
1972-73	187,552	12,072	5.74

[a] The combined average of teacher salaries in all school districts and county offices of education is obtained by dividing the total number of teachers into the total amount of salaries.

[b] Does *not* include teachers in 12 school districts which did not respond to the survey (approximately 1.2 percent of all teachers).

Table II-2

Number of Full-Time-Equivalent Employees in California School Districts as of November, 1976

Classification of districts	Number of districts	Units of average daily attendance (1975-76 fiscal year)	Number of full-time-equivalent employees					
			Certificated employees				Classified employees	Total
			Adminis-trative	Pupil services	Teachers	Subtotal		
Unified	258	3,152,398	10,098.7	9,281.0	139,544.9	158,924.6	95,803.2	254,727.8
Elementary (101 a.d.a. and over)	497	890,353	2,931.5	1,768.9	38,534.5	43,234.9	28,156.6	71,391.5
High school (301 a.d.a. and over)	86	485,261	1,247.1	2,120.3	20,693.3	24,060.7	12,295.2	36,355.9
Common administration	42	164,193	467.0	553.7	7,472.1	8,492.8	5,053.4	13,546.2
Subtotal, districts reporting	883	4,692,205	14,744.3	13,723.9	206,244.8	234,713.0	141,308.4	376,021.4
Estimates for districts not required to report:								
Elementary (under 101 a.d.a.)	151	7,438	151.0	0.0	302.0	453.0	161.0	614.0
High school (under 301 a.d.a.)	8	1,510	8.0	4.0	16.0	28.0	24.0	52.0
Subtotal	159	8,948	159.0	4.0	318.0	481.0	185.0	666.0
Total	1,042	4,701,153	14,903.3	13,727.9	206,562.8	235,194.0	141,493.4	376,687.4

Table II-3

Ratio of Full-Time-Equivalent Personnel to Full-Time-Equivalent Classroom Teachers in California Public Schools as of November, 1976

Classification of districts	Number of districts	Units of average daily attendance (1975-76 fiscal year)	Ratio (per 100 teachers)		
			Adminis-trative	Pupil services	Classified
Unified	258	3,152,398	7.2	6.7	68.7
Elementary	497	890,353	7.6	4.5	73.1
High school	86	485,261	6.0	10.2	59.4
Common administration	42[a]	164,193	6.3	7.4	67.6
Total	883	4,692,205	7.1	6.7	68.5

[a] Twenty-one ratios were reported for common administration districts; each ratio was obtained from combined data of an elementary and a high school district.

Table II-4

California Public School Enrollments, Fall, 1975, and Fall, 1976

Grade or class	Fall 1975	Fall 1976	Increase or decrease between fall, 1975, and fall, 1976	
			Number	Percent
Graded enrollment

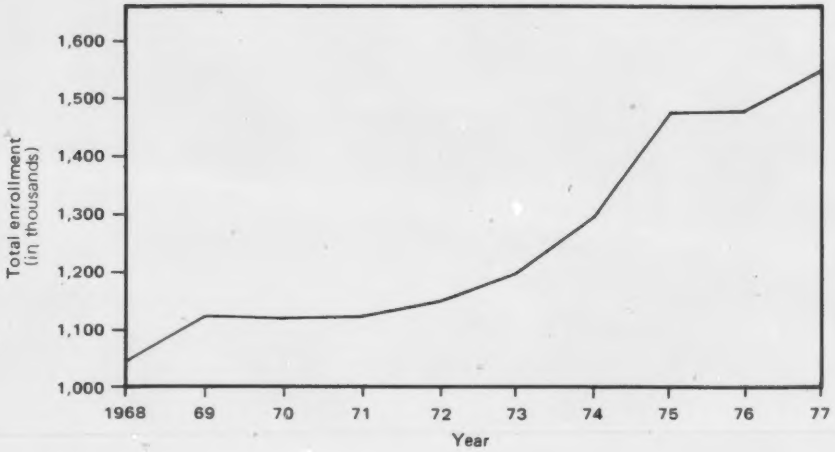
Growth in Summer School Attendance, Kindergarten Through Grade Twelve, 1968 Through 1977



Part III/ Textbooks, Public School Revenues, Assessed Valuation, Revenue Limit and Bond Elections, and Tax Rates

Textbooks

California is the only state in the United States that prints its own textbooks and provides them without cost to school districts operating kindergarten or grades one through eight. At the high school level, textbooks are purchased directly from the publishers by the school district. The State Board of Education determines which elementary textbooks will be used and makes the required adoptions. However, in determining which textbooks it will adopt, the Board gives full consideration to the recommendations made by the Curriculum Development and Supplemental Materials Commission. Established by law in 1927, the commission is composed of outstanding educators appointed primarily by the State Board of Education but also by the Legislature and the Governor.

Originally, the state provided a single textbook in each subject for each grade; later, supplementary textbooks were added. More recently, a variety of basic and supplementary textbooks has been provided to accommodate pupils of varying abilities and social backgrounds. Special materials also have been provided to help teachers use textbooks effectively.

Recent legislation authorizes the issue of instructional materials such as films, tapes, flash cards, kits, phonograph records, graphs, charts, and multimedia systems in addition to the textbooks authorized by previous legislation. School districts were permitted to order such items for use in the 1974-75 school year and in following years. Tables III-1A through III-1C present data on textbooks.

Revenues

The three sources of revenue for public school support are characterized as "local," "state," and "federal." Property taxes provide most local revenues. State revenues are apportioned to school districts for general use and for categorical or specified use. In addition, state revenues are committed to teacher retirement benefits, liquidation of state school building aid bonds, and purchase of elementary school textbooks. Federal revenues are largely directed to categorical use in support of specific programs (Table III-3) and may be transmitted directly to school districts or indirectly through the State Department of Education or through offices of county superintendents of schools.

Assessed Valuation

The ability of a school district to provide local revenues can be measured by the amount of assessed valuation that exists for each unit of average daily attendance. California is moving toward uniform assessment among the 58 counties. So that more uniform assessments for public school purposes can be achieved, the assessed valuation in individual counties is modified by the Collier factor, which takes into account the relationship of the county assessment level to the statewide average assessment level.

Some state revenues are apportioned to all school districts as basic aid, and additional state revenues are apportioned to some districts as equalization aid to compensate for low assessed valuation per unit of average daily attendance. Table III-6 presents data on assessed valuation per unit of a.d.a. for the elementary school and the high school levels; these data are used for apportionment purposes. Tables III-7, III-8, and III-9 present the assessed valuation per unit of a.d.a. for unified, elementary school, and high school districts to illustrate the disparities in assessed valuations among districts as highlighted in the *Serrano* case.

Revenue Limit Elections

A major feature of Senate Bill 90/1972, which established a new school finance program for California public schools, is the imposition of annually computed revenue limits on school districts. As a result the general-purpose tax rate intended to produce the local portion of revenues supporting schools is controlled. School district governing boards must receive voter approval to increase the computed revenue limits. The ballot proposition presented to the voters for their approval must include the estimated increase in the general-purpose tax that would be caused by the proposed increase in the revenue limit. In 1976-77 a total of 72 elections were held in which voters were asked to approve increased revenue limits. A total of 33 (45.8 percent) of the elections were successful.

Bond and State Loan Elections

California is one of the very few states that require more than a simple majority vote to incur long-term indebtedness. In a statewide referendum, however, California voters approved the use of a simple majority to approve state bonds and loans for the replacement or rehabilitation of school buildings that fail to meet earthquake safety standards. This special authorization expired in 1975.

Table III-1 A

Number of Textbooks in State Adoption for Kindergarten Through Grade Eight in California Public Schools, by Selected Years

Year	Number of textbooks	Year	Number of textbooks
1940-41	59	1965-66	437
1945-46	85	1970-71	753
1950-51	137	1971-72	801
1955-56	195	1972-73	803
1960-61	305	1973-74	845

Table III-1 B

Number of Instructional Materials in State Adoption for Kindergarten Through Grade Eight in California Public Schools

Year	Number of textbooks	Number of audio-visual materials	Total number of titles
1974-75	1,011	246	1,257
1975-76	3,822	1,939	5,761
1976-77	4,090	4,010	8,100
1977-78	4,499	4,321	8,820

The impact of the two-thirds requirement for regular bond elections is dramatically illustrated by the outcome of the 44 elections held in California school districts in 1976-77. Of the 44 issues voted upon, 25 percent were successful; under a simple majority requirement, 82 percent would have been successful.

Tax Rates

Senate Bill 90 eliminated a large number of the permissive tax overrides available to school district governing boards to finance specific programs. Those levies associated with various recoupments, employee benefits, or special pupils were absorbed within the general purpose tax; and those levies associated with capital outlay or debt service were allowed to remain as permissive overrides. A given parcel of property may be subject to an assortment of elementary school, high school, and community college district taxes. Table III-19 presents various tax rates for individual school districts.

Table III-1 C

State General Fund Expenditures for Elementary Textbooks in California

Year	General Fund expenditures	Year	General Fund expenditures
1957-58	$5,325,860	1967-68	$21,260,092

Federal Support, California School District General Funds, by Program

Program	Amount of federal revenue				
	1976-77	1975-76	1974-75	1973-74	1972-73
Maintenance and Operation (P.L. 81-874)	$84,340,030	$65,839,568	$80,851,709	$74,635,938	$69,352,066
Veterans' Education	206,625	314,936	508,727	3,265,569	498,839
Education Professions Development Act (P.L. 90-35)	911,308	1,964,868	1,902,366	7,667,322	1,061,332
Economic Opportunity Act (P.L. 88-452)	11,596,088	12,263,036	14,356,313	21,775,570	23,032,830
Elementary and Secondary Education Act (P.L. 89-10)	182,910,930	181,679,737	173,358,773	139,457,612	152,481,916
Comprehensive Employment and Training Act (P.L. 93-203)	60,530,481	58,584,561	26,750,193	12,979,788	26,912,536
National Defense Education Act (P.L. 85-864)	522,273	1,474,402	2,098,450	2,192,774	751,968
Manpower Development and Training Act (P.L. 87-415)	554,437	1,321,544	3,567,695	7,656,053	8,812,352
Vocational Educations Amendments of 1968 (P.L. 90-576)	22,868,742	22,856,978	21,463,973	32,576,872	29,769,133
Forest Reserve Funds (Education Code Section 2300)	14,320,722	7,718,685	13,044,902	11,247,210	9,267,615
Vocational Education Aid (Smith-Hughes, George-Barden Acts) [a]	–	–	–	1,961,494	1,787,362
Preschool Education Aid (McAteer Act) [a]	–	–	–	8,994,494	10,102,701
Higher Education Facilities Act of 1963 [b]	–	–	–	1,096,513	839,679
School Construction (P.L. 81-815) [b]	–	–	–	1,725,702	1,819,189
Miscellaneous Funds (Education Code Section 41604) [a]	2,320,439	8,468,205	1,071,571	1,812,288	3,672,398
Other Miscellaneous Funds [a]	53,900,272	51,383,711	60,744,302	50,754,951	52,890,017
Totals	$434,982,347	$413,870,231	$399,718,974	$379,800,150	$393,951,933

NOTE: Support for community college districts is included in revenue shown for the years 1972-73 and 1973-74 but not for 1974-75, 1975-76, or 1976-77.

[a] Includes some state funds.

[b] General Fund portion only; additional revenue reported in other funds.

Table III-4

Percent of California Public School Revenues, by Source

Year	Percent of total revenue, by source			
	Local	State	Federal	Miscellaneous
1965-66 ...	55.63	37.86	3.89	2.62
1966-67 ...	56.02	34.94	6.64	2.40
1967-68 ...	54.96	36.14	6.47	2.43
1968-69 ...	56.32	34.77	6.16	2.75
1969-70 ...	55.06	36.64	5.62	2.68
1970-71 ...	55.22	35.78	6.24	2.76

1975-76 ...	3,059,455,111	45.0	3,742,954,203	55.0	6,802,409,314	1:1.22

NOTE: Data include support for community college districts for 1955-56 through 1973-74 but not for 1974-75 or 1975-76.

[a] State revenues (Governor's Budget and Controller's Report) include apportionments to school districts, debt service on school construction bonds, teacher retirement, textbooks, and vocational education.

[b] Local revenues (Controller's Report) include General Fund taxes, bond interest and redemption taxes, community college tuition, high school tuition, and taxes levied for offices of county superintendents of schools.

Table III-6

Assessed Valuation per Unit of Average Daily Attendance in California Public Schools

Year	Elementary level		High school level	
	Assessed valuation per unit of a.d.a.	Index of change over base year	Assessed valuation per unit of a.d.a.	Index of change over base year
1963-64	$12,370	100	$32,842	100
1964-65	12,484	101	32,763	100
1965-66	12,983	105	33,821	103
1966-67	13,602	110	35,015	107
1967-68	14,068	114	36,255	110
1968-69	14,752	119	36,993	113
1969-70	15,841	128	38,447	117
1970-71	16,843	136	40,262	123
1971-72	18,108	146	41,072	125
1972-73	19,750	160	43,599	133
1973-74	21,525	174	45,675	139
1974-75	24,007	194	48,659	148
1975-76	26,678	216	52,659	160
1976-77	30,666	248	63,360	193

NOTE: Average daily attendance data are those used for the Second Principal Apportionment each year. A.d.a. data exclude the County School Service Fund and the County School Tuition Fund. Assessed valuation data are for all school districts in the state at that level. "Modified assessed valuation" is used.

Index: 1963-64 (base year) = 100.

Assessed Valuation per Unit of Average Daily Attendance 1963-64 Through 1975-76 (in Thousands of Dollars)

NOTES: Elections prior to 1973-74 were tax rate elections rather than revenue limit elections. Some tax elections were in sections, with tax increase proposals in each. This table was prepared on the basis of the first tax rate scheduled to be in effect.

Elections for community college districts were omitted from this table.

Table III-10 B

Proposed Tax Rate Increase and Outcome of California School District Revenue Limit Elections, 1976-77

NOTES: ***Total tax rate*** is the sum of rates levied against the assessed valuation of the district to provide local revenue to support the current operations of the district, to meet long-term debt obligations, and to finance certain programs or services initiated at the discretion of the district governing board.

General Purpose tax rate is the rate levied in conjunction with the district revenue limit plus the areawide tax levied, where appropriate. (In 1976-77 nine high school, ten unified, and 620 elementary districts were subject to areawide taxes.) Currently, the General Purpose tax rate of a school district is determined annually to provide local revenues sufficient to complement state apportionments in meeting the district revenue limit amount. However, the district governing board may choose to operate with a revenue limit lower than the authorized revenue limit and consequently will levy a General Purpose tax that is lower than that authorized.

Adult Education tax rate is the rate levied in conjunction with the adult revenue limit. Currently, the Adult Education tax rate of a school district is determined annually to provide local revenues sufficient to complement state apportionments in meeting the district's adult revenue limit amount. However, the district governing board may choose to operate with an adult revenue limit lower than the authorized revenue limit and consequently will levy an Adult Education tax that is lower than that authorized.

Capital Outlay and/or Debt Service tax rate is the sum of district tax rates levied to liquidate long-term debt that includes the principal and interest of outstanding bonds and/or the principal and interest on state construction loans. Rates associated with the leasing of facilities and with earthquake safety correction measures also are included. All rates except those associated with earthquake safety correction measures and the Regional Occupational Centers or Programs result from voter approval. The latter rates are levied at the discretion of the local governing board within statutory maximum rates.

NOTE: School district governing boards may choose to make school buildings and playgrounds available for civic and recreational purposes or may choose to provide breakfast and lunch free or at a reduced price for needy pupils. In either instance the attendant costs may be covered by revenues derived from a permissive override tax with statutory maximum rates. The governing boards may choose to operate Children's Centers or Development Centers for Handicapped Minors with the approval of the Superintendent of Public Instruction, and they may levy permissive override taxes for revenues to augment state aid and federal funds available to such programs.

Part IV/Public School General Fund Expenditures

School district budgeting and accounting systems include a variety of funds, but the General Fund is common to all operating school districts. Additional funds maintained by some school districts include the Bond Interest and Redemption Fund, the Building Fund, the Special Reserve Fund, the State School Building Aid Fund, the Cafeteria Fund or Account, the Child Development Fund, and the Development Center for Handicapped Pupils Fund. *The California School Accounting Manual* provides for the uniform identification and classification of all expenditures of school districts and is consistent for the several funds.

This publication presents General Fund expenditures only. The State Controller's publication, *Annual Report: Financial Transactions Concerning School Districts of California*, includes income and expenditure data for all funds.

The 1973 edition of the *California School Accounting Manual*, implemented in the 1974-75 school year, incorporated extensive revisions in the school accounting system. The previous practice for accounting of expenditures by function was overhauled in favor of accounting by object. This approach allows greater flexibility because object accounts may be combined in any number of ways to illuminate many different kinds of programs.

The accounting manual provides for seven major General Fund object of expenditure classifications: (1) 1000–**Certificated Salaries**; (2) 2000–**Classified Salaries**; (3) 3000–**Employee Benefits**; (4) 4000–**Books, Supplies, and Equipment Replacement**; (5) 5000–**Contracted Services and Other Operating Expenses**; (6) 6000–**Capital Outlay**; and (7) 7000–**Other Outgo**. Each of these major classes has several subordinate classes.

The Total Current Expense of Education as amended by the 1973 manual is the sum of major object of expenditure classifications 1000 through 5000, excluding expenditures in each of the classifications for community services, food services, and facilities acquisition and construction. Food Services, Community Services, and Capital Outlay are not considered part of Total Current Expense of Education because of the variation of expenditure in these classes among school districts; however, such expenditures are added to the Total Current Expense to yield a Total Expenditure amount.

The tables in Part IV present dollar amounts for the several objects of expenditure, the amount per unit of average daily attendance, and the percent of total expenditures each amount represents. Table IV-14 presents similar and related data for individual school districts. Tables IV-8 through IV-12 illustrate the manner in which the new objects of expenditure may be combined to yield expenditures by program.

Table IV-1 A

NOTES: "Current expense of education" includes expenditures of classes 1000 to 5000, inclusive, in the *California School Accounting Manual* (Less Food Services, Community Services, and Facility Acquisition) beginning with the 1974-75 school year.

"Total expenditures" includes expenditures of classes 1000 to 6000, inclusive, in the ***California School Accounting Manual,*** beginning in 1974-75.

[a] Figures for 1974-75, 1975-76, and 1976-77 do not include community college districts.

Table IV-2 A

Average Daily Attendance and General Fund Current Expense of Education in All California School Districts

Fiscal year	Average daily attendance	Current expense of education	
		Amount	Per unit of of a.d.a.
1965-66	4,563,664	$2,262,303,990	$539.55
1966-67	4,719,231	2,765,700,341	586.05
1967-68	4,922,966	3,099,518,437	629.60
1968-69	4,998,299	3,519,740,669	704.19
1969-70	5,091,196	3,892,092,851	764.63
1970-71	5,209,634	4,317,109,956	828.68
1971-72	5,216,242	4,691,093,803	899.32
1972-73	5,202,728	5,040,813,176	968.88
1973-74	5,222,080	5,622,761,499	1,076.73
1974-75[a]	4,665,615	5,616,350,524	1,203.77
1975-76[a]	4,699,266	6,123,561,192	1,303.09
1976-77[a]	4,666,780	6,686,491,831	1,432.78

[a] Figures for 1974-75, 1975-76, and 1976-77 do not include community college districts. See also notes following Table IV-1 A.

Table IV-2 B

Average Daily Attendance and General Fund Current Expense of Education in California Unified, Elementary, and High School Districts

Fiscal year	Average daily attendance	Current expense of education	
		Amount	Per unit of a.d.a.
1970-71	4,692,295	$3,866,082,482	$823.92
1971-72	4,664,034	4,181,180,917	896.47
1972-73	4,629,135	4,488,870,271	969.70
1973-74	4,612,621	4,997,354,364	1,083.41
1974-75	4,699,266	5,616,350,524	1,203.77
1975-76	4,699,266	6,123,561,192	1,303.09
1976-77	4,666,780	6,686,491,831	1,432.78

See notes following Table IV-1 A.

Table IV-3

Average Daily Attendance in California Public Schools, by Jurisdiction and by Grade Span, 1976-77

Jurisdiction	Grade span	A.d.a. 1976-77	Percent
Unified school districts	K–12	3,135,001	67.18
Elementary school districts	K–8	952,046	20.40
High school districts	7–12	579,733	12.42
Subtotal, kindergarten through grade twelve		*4,666,780*	*100.00*
Office of the County Superintendent of Schools, paid for from			
County School Tuition Fund:			
Elementary	1–8	30	
High school	9–12	96	
County School Service Fund:			
Elementary	1–8	15,338	
High school	9–12	36,545	
Subtotal, classes under jurisdiction of the County Superintendent		*52,009*	
Total		4,718,789	

General Fund Expenditures, 1976-77
